

REMARKS

The foregoing amendment to the specification deletes information without prejudice. The amendment to the specification reflects cancellation of Figures 5 through 15.

Applicants further have attached items (A) "An e-mail from Frederick Boyle to the other named inventors of the present invention, relating to reviewing the initial draft of document (B) below" and (B) "Initial draft of the first 4 pages of a patent application titled 'Method for Temperature Compensating Sensor Data When Monitoring Quality/Condition of Fluids On-Line'", indicated in the Declaration under 37 CFR 1.131.

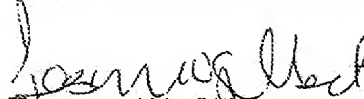

Applicants' response should now be fully responsive to the prior office actions in this case, which was ^{un-}intentionally abandoned, in that Applicants believe they have provided the necessary items (A) and (B) and further believe that they have deleted the appropriate sections of the specification.

Accordingly, Applicants respectfully request that their petition to revive this application be granted.

A Petition Fee in the amount of \$1,500.00 is to be charged to The Lubrizol Corporation Deposit Account No. 12-2275. If any additional fees are due in connection with the filing of these documents, the Commissioner is authorized to charge those fees to the same deposit account. A duplicate of this Response is enclosed for such purpose.

Respectfully submitted,

THE LUBRIZOL CORPORATION
